

AIBotCoin White Paper

Introduction

AIBotCoin is a next-generation memecoin powered by artificial intelligence (AI), ChatGPT, one developer and blockchain technology.

Designed to capitalize on the growing trend of automated systems and the proliferation of AI, AIBotCoin aims to revolutionize the memecoin market by incorporating unique tokenomics, a strong community-driven ethos, and a long-term roadmap that prioritizes sustainability and ecosystem development.

Tokenomics

- Total Supply: 5 trillion AIBotCoins (ABC)
- Burned Supply: Over 4 trillion AIBotCoins have already been burned (sent to the dead wallet), effectively reducing the circulating supply to 5 trillion.
- No Buy/Sell Tax on Transfers: No tax on wallet-to-wallet transfers (0% marketing transfer fee).
 - Community-Driven: AIBotCoin is a decentralized, community-driven project.

Roadmap

- Q4 2024: Token launch and initial liquidity pool creation on decentralized exchanges.
 - Q1 2025: Build and launch AIBotCoin staking platform.
- Q1 2026: Begin first round of marketing campaigns and community-building initiatives.

- Q1 2027: Continue expanding (listings)
- Q4 2027: Renounce Ownership (Community Driven from here on)

Note

The blacklist function is enabled due to the following:

- Preventing Exploitative or Malicious Activity
- Protecting Against Known Security Threats
- Blocking Known Scammers or Bad Actors
 - Ensuring Compliance with Regulations

We hope you understand. Thank you!

-Dev

Conclusion

AlBotCoin represents the next phase in the evolution of memecoins, combining the viral appeal of memes with the real-world utility of AI and DeFi. Built on strong tokenomics, a vibrant community, and a clear roadmap, AlBotCoin is poised to create long-term value and revolutionize the future of decentralized finance.
